Very useful to see how your store visitors using this payment method

- **Test mode support**

Enables you to test prior to enabling this X-Cart mod as payment method

- **Ability to disable Google Checkout for specific products**

Allows to exclude products which are not accepted by Google

- **Supports Google Analytics integration**

- **Includes detailed installation instruction**

Google Analytics enables a merchant to understand how visitors interact with the merchant's website. Google Analytics also helps the merchant to identify navigational components that promote or inhibit conversions to sales, enabling the merchant to optimize ad campaigns and website content for increased sales.

Google Checkout merchants can use Google Analytics to track buyers who leave their sites to complete the checkout process using Google Checkout.

Google Checkout offers numerous Special Deals for you and your customers!

After installing you receive Google Checkout button under your store checkout button, along with all the server side features Google Checkout offers.

We **HIGHLY RECOMMEND** you to add this payment method to your store.

Customers love Google - they will love your store!

This package contains all files needed plus an updated readme file with detailed installation instruction.

This X-Cart Mod implements Google Checkout API Level 2 integration.

I Do Recommend This X-Cart Mod:

I want to just take a moment to let you know I'm quite pleased with both this product and the level of service we have received from MagneticOne in supporting it. It's been a tricky integration just due to the newness of Google's Checkout service, plus we used a heavily customized version of X-Cart. MagneticOne has been endlessly patient in working with us to solve every issue we've encountered. We now have this working just fine, and are processing live orders daily through Google Checkout.

I would definitely recommend MagneticOne's products. The support they provide is excellent and the product works as advertised. Good job!

A great X-Cart mod

Everything working 100% fine for me to start charging by Google.

A great X-Cart mod and I can now start using Google checkout.
